NEWTON CLASSES

JEE (MAIN & ADV.), MEDICAL + BOARD, NDA, IX & X

Analogy

Practice Exercise

Direction : (1 to 9) In each of the following questions, a related pair of figures (unnumbered) is followed by five other pairs of figures numbered as 1, 2, 3, 4 and 5. Out of the five numbered pairs, select the pair that has a relationship similar to that in the unnumbered pair. The best answer is to be selected from a group of fairly close choices.

1. Problem Figures

8.

Direction : (10 to 11) In the following questions there are two sets of figures. One set is problem figures and the second set is a answer figures. There is some relationship between the first and the second figure of the problem figures set. If there is similar relationship between the third and fourth figures of the same set, select the correct figures from the set of answer, figures for question mark (?)

Direction : (12) In the following questions there are two sets of figures. One set is problem figure and the second set is a answer figures. There is some relationship between the first and the second figures of the problem figures set. If there is similar relationship between the third and fourth figures of the same set, select the correct figure from the set of answer figures for question mark (?)

12. Problem Figure

Answer Figures

Direction : (13 & 14) In the following questions, there is a relationship between the two figures on the left of the sign (::). The same relationship exists between the figures to the right of the sign (::), of which one is missing. Find the missing one from the alternatives.

Direction : (15) In the following question there are two sets of figures. One set is problem figure and the second set is answer figures. There is some relationship between the first and the second figures of the problem figure set. If there is similar relationship between the third and fourth figures of the same set, select the correct figure from the set of answer figures for question mark (?)

Direction : (16 to 18) There is some relationship between the two figures/pair of letters/numbers on the left of the sign (::). The same relationship exists between the two terms on the right of which one is missing. Find the missing one from the given alternatives.

Directions : (19 and 20) : In the following questions, some figures are given in a sequences Find out the figure from the alternatives, which will come in place of the questions mark to continue the sequences.

Direction : (21) Study the pattern of figures given in each question to find out the relationship among them. One figure is missing. Choose the missing figure from the alternatives.

Direction : (22 to 44) In such questions, you are given a set of five (or four) figures labelled A, B, C, D and E called Problem figures that follow a certain sequence and hence form a series. However, one of these five figures is missing and is indicated by a question mark '?'. A figure is to be selected from another set of five figures labelled 1, 2, 3, 4 and 5, called Answer figures, that would replace the question mark so as to establish the series.
